

A look back at Quebec's Electric Vehicle Week

There was a variety of programming offered during the 2nd edition of Quebec's Electric Vehicle Week, which took place virtually from October 19 to 25. Webinars on a wide range of topics from second-hand EVs, information about charging as well as a round table on transportation electrification are available for viewing on the Running Electric website.

Videos from the Conseils régionaux de l'environnement

The Conseils régionaux de l'environnement produced a series of videos about the realities of electric cars in different regions of Quebec, highlighting resident EV users. The videos help to debunk some of the myths about electric cars for individuals and organizations, in both rural and urban areas. Get inspired by these testimonials, more of which will be added in the coming weeks.

À CONTRESENS documentary

There is a lot of debate around electric cars, in Quebec and elsewhere. À contresens, a Swiss documentary, has a look at the negative information about EVs in the media and does an investigation to confirm or refute this information. The production team travels from the cobalt mines in the Democratic Republic of Congo to the desert of Chile where lithium is extracted. The North American premiere of this hard-hitting documentary will take place on Thursday, December 17 at 7 pm, and is open to the public. The screening of the documentary will be followed by a discussion with the film's production team and some of Quebec's key players in transportation electrification.

A word from our partners Quebec Electric Vehicle Association pairing program

The Quebec Electric Vehicle Association pairing program is now available in virtual mode! This free service puts you in touch with an EV driver who owns an electric vehicle model that interests you. You can then set up a virtual meeting (via Zoom) with your volunteer. No sales related pressure, only answers to your questions.
