

### Vacationing in an electric vehicle

Feel like a trip in an electric vehicle? It's absolutely doable! With EVs boasting a range of up to 400 kilometres and a Quebec network of over 6,000 public recharging stations, it's easy to get away in an electric vehicle. Get inspired by the adventure that Marie-Ève and her daughter Arianne embarked on. They discovered the Gaspésie aboard their rechargeable vehicle.

### Launch of inaugural electric tourism circuits

At the end of June the Tourism Ministry launched the province's first electric tourism circuits as part of the Explore Québec – Circuits branchés pilot project. Quebecers can now choose from among seven packages to visit various parts of Quebec in an electric vehicle, with access to recharging stations all along the way. Reserve your Explore Québec package with a participating travel agency and get at least 25% off the package price.

### Used electric vehicles: good for your wallet, good for the environment

There are numerous advantages to choosing a used electric vehicle: lower purchase price, the same energy savings as with a new EV, eligibility for a government subsidy and guaranteed reliability thanks to the 8-to-10-year warranty on the battery. When you choose a used electric vehicle, you're choosing a vehicle whose environmental impacts have already been partially or fully offset. A number of dealerships specialize in the sale and servicing of used plug-in vehicles, such as [Véhicules Électriques Simon André](#).
